

### Town Services Comments

bad traffic on Riverside. Bad dust. no big development at JRP please. no big bathroom in center of drainage not so good from 8th and Riverside East, closer to my residence now 1 block away

dust is the main concern

Enforce people to clean up their yards!

get a health clinic here, bring in large business, not art galleries.

hard water

I believe being able to walk and ride bikes around all parts of town, year round, should be a top

I really appreciate the effort the town has made to keep the river trail free of snow. I walk the trail almost everyday and is really nice to have it plowed so quickly after a snowstorm.

Include a fall clean up (in addition to the spring clean up). More shade for the parks. Put more road base on the river trail. Increase speed control traffic law enforcement and noise code enforcement. Protect dark skies, reduce light pollution, and become a dark sky community. Maybe solicit feedback from residents more often -- thanks for putting this survey out there.

keep sidewalks clear year round!

look at EWG water quality. Dolores is worst in MTZ County!!

low water pressure.

low water pressure. last board was bad!

My house on 8th & Hillside has a horrible drainage problem. There is a swamp downhill from the sewer grate creating an access issue to my side gates. In the winter the snow is not removed and then an ice rink forms once that starts to melt making access on Hillside very problematic. Dirt needs to be moved from the area in front of the grate to the swampy area and alot (don't know how much) of gravel needs to be dropped to rebuild the slope to the sewer grate. I'd be happy to speak with

Need better code enforcement

Services need to cover 5 or 6 days a week so that Fridays and Saturdays public facilities are maintained like trash and bathrooms so they are not locked in the winter.

snow removal is a concern for this citizen

Susan Lisak has been doing the most fantastic job despite the huge obstacles thrown in her way by the town of Dolores. She gives me hope my children could actually grow up here and have a good life.

The Town staff does a pretty good job maintaining Joe Rowell Park, and has improved snow removal.

Still need to get after weeds using some integrated Mgt including the use of appropriate herbicides

The water has a chemical smell and doesn't taste good.

trails as a service

Water does not run from streets into storm drains; dust on roads in summer gets really bad

We need an easier way to pay bills.
